

Business Requirements Document (BRD)

1. Executive Summary

This Business Requirements Document (BRD) defines the business needs and high-level requirements for developing an Online Food Delivery Platform. The objective is to provide a centralized digital solution that connects customers, restaurants, and delivery partners to improve ordering efficiency, reduce errors, and enhance customer satisfaction.

2. Business Objectives

Objective ID	Business Objective	Measurement Criteria
BO-01	Increase online food orders	40% growth within 12 months
BO-02	Reduce manual order errors	60% error reduction
BO-03	Improve customer experience	App rating ≥ 4.5
BO-04	Enable scalable operations	Support peak order volumes

3. Business Problem Statement

The current phone-based food ordering process lacks automation and transparency, resulting in order inaccuracies, delayed deliveries, limited scalability, and poor customer experience. A digital platform is required to overcome these challenges and support business growth.

4. Current State (AS-IS)

Process Area	Current State Description	Issues Identified
Order Placement	Customer places order via phone call	High chance of miscommunication
Payment	Cash on delivery only	No payment tracking
Order Tracking	Manual follow-up calls	No real-time visibility
Reporting	Manual records	No data-driven insights

5. Future State (TO-BE)

Process Area	Future State Description	Business Benefit
Order Placement	Online ordering via app/web	Accurate and faster ordering
Payment	Online and COD options	Secure and traceable payments
Order Tracking	Real-time status updates	Improved transparency
Reporting	Automated dashboards	Better decision-making

6. Business Requirements

BR ID	Requirement Description
BR-01	Customers shall be able to register and log in digitally
BR-02	Customers shall browse restaurants by location
BR-03	Customers shall place food orders online
BR-04	Customers shall make online payments
BR-05	Restaurants shall receive and manage orders digitally
BR-06	Admin shall manage users and restaurants

7. Scope Definition

In Scope	Out of Scope
Online ordering system	Table reservations
Payment integration	Loyalty programs
Order tracking	AI-based recommendations

8. Assumptions and Constraints

Type	Description
Assumption	Users have internet-enabled devices
Assumption	Restaurants have basic digital access
Constraint	Project timeline limited to 6 months
Constraint	Fixed project budget

9. Stakeholders

Stakeholder	Role	Responsibility
Business Sponsor	Project owner	Funding and approval
Product Owner	Business representative	Feature prioritization
Business Analyst	Requirement lead	Documentation and analysis
Development Team	Technical team	System development
QA Team	Quality assurance	Testing and validation

10. Success Metrics

Metric	Target Value
Order success rate	$\geq 95\%$
Average delivery time	≤ 45 minutes
Customer satisfaction	≥ 4.5 rating

11. Risks and Dependencies

Category	Description
Risk	Low restaurant adoption
Risk	Payment gateway downtime

Dependency	Third-party payment provider
Dependency	SMS/Email notification services

12. Approval and Sign-Off

Name	Role	Signature	Date
Business Sponsor	Approval Authority		
Product Owner	Business Approval
