

User Acceptance Testing (UAT) Document

1. Introduction

This User Acceptance Testing (UAT) document defines the approach, scope, and test cases used to validate that the Online Food Delivery Platform meets approved business requirements and is ready for production deployment.

2. UAT Objectives

Objective ID	Objective Description
UAT-OBJ-01	Validate end-to-end business workflows
UAT-OBJ-02	Ensure solution meets business requirements
UAT-OBJ-03	Obtain formal business sign-off

3. UAT Scope

In Scope	Out of Scope
User registration and login	Performance testing
Order placement and payment	Security penetration testing
Order tracking	Backend API testing
Restaurant order management	Infrastructure testing

4. UAT Entry and Exit Criteria

Criteria Type	Description
Entry	All functional testing completed successfully
Entry	Stable UAT environment available
Exit	All critical and high severity defects closed
Exit	Formal business sign-off obtained

5. UAT Roles and Responsibilities

Role	Responsibility
Business User	Execute UAT test cases
Product Owner	Approve UAT results
Business Analyst	Coordinate and support UAT
QA Team	Log and track defects

6. UAT Test Scenarios

Scenario ID	Scenario Description
UAT-SC-01	Customer registration
UAT-SC-02	Restaurant browsing
UAT-SC-03	Order placement

UAT-SC-04	Payment failure handling
UAT-SC-05	Order tracking
UAT-SC-06	Restaurant order acceptance

7. Detailed UAT Test Cases

Test Case ID	Scenario	Test Steps	Expected Result	Status
UAT-TC-01	User Registration	Enter mobile number, verify OTP	User registered successfully	Pass
UAT-TC-02	Order Placement	Select items and place order	Order placed successfully	Pass
UAT-TC-03	Payment Failure	Trigger payment failure	Error displayed and retry allowed	Pass
UAT-TC-04	Order Tracking	View order status	Real-time updates shown	Pass
UAT-TC-05	Restaurant Acceptance	Accept order	Customer notified	Pass

8. Defect Log

Defect ID	Description	Severity	Status
UAT-DEF-01	Payment retry option not visible	Medium	Fixed
UAT-DEF-02	Delivery ETA delay	Low	Fixed

9. UAT Sign-Off

Name	Role	Signature	Date
Product Owner	Business Approval		
Business Sponsor	Final Approval		

10. Conclusion

Successful completion of UAT confirms that the solution meets business expectations and is approved for production deployment.
