

Business Requirement Document (BRD)

Online Food Delivery Platform

1. Document Control

Attribute	Details
Document Name	Business Requirement Document (BRD)
Project	Online Food Delivery Platform
Version	1.0
Prepared By	Lalita Khatri
Date	06-Jan-2026
Status	Draft

2. Executive Summary

The Online Food Delivery Platform aims to provide a digital marketplace that connects customers, restaurants, and delivery partners.

The system will streamline food ordering, payment processing, and delivery tracking while enabling operational transparency and business growth.

3. Business Objectives

Objective ID	Business Objective
BO-01	Increase customer convenience through online ordering
BO-02	Expand restaurant reach and order volume
BO-03	Reduce order processing time
BO-04	Improve delivery efficiency and tracking
BO-05	Enable data-driven business decisions

4. Business Scope

4.1 In-Scope

Area	Description
Customer Ordering	Browse, order, and track food
Restaurant Operations	Menu and order management
Delivery Management	Assignment and tracking
Payments	Online and cash payments
Administration	User and order monitoring

4.2 Out-of-Scope

Area
Grocery delivery
International delivery
In-house food preparation
Hardware device integration

5. Stakeholders

Stakeholder	Responsibility
Business Owner	Strategic direction
Product Owner	Requirement prioritization
Restaurants	Food preparation
Delivery Partners	Order fulfillment
Customers	Platform usage
Operations Team	System support

6. Current Challenges

Challenge	Impact
Manual order handling	Delays and errors
Limited restaurant visibility	Reduced customer choice

No real-time tracking	Poor customer experience
Cash-only payments	Revenue leakage

7. Proposed Business Solution

The platform will:

- Digitize end-to-end food ordering
- Provide real-time delivery visibility
- Support multiple payment options
- Offer dashboards and reporting
- Improve customer engagement through ratings and offers

8. Business Requirements

BR ID	Requirement Description	Priority
BR-01	Customers shall be able to place food orders online	High
BR-02	Restaurants shall manage menus digitally	High
BR-03	Delivery partners shall receive delivery assignments	High
BR-04	System shall support online payments	High
BR-05	Admin shall monitor system activity	Medium

9. Assumptions

Assumption
Internet connectivity is available
Restaurants keep menus updated
Delivery partners use smartphones
Payment gateways are reliable

10. Constraints

Constraint Type	Description
Regulatory	Compliance with food and payment laws
Technical	Dependence on third-party APIs

Time	Phased rollout required
Budget	Fixed development budget

11. Success Metrics

Metric	Target
Order Success Rate	$\geq 95\%$
Average Delivery Time	≤ 40 minutes
Customer Rating	≥ 4.2
System Uptime	$\geq 99.5\%$

12. Risks and Mitigation

Risk	Mitigation
Delivery delays	Dynamic partner allocation
Payment failures	Multiple gateways
High peak load	Scalable infrastructure
Low adoption	Promotions and onboarding

13. Approval

Role	Name	Signature
Business Sponsor		
Product Owner		
Project Manager		

14. Conclusion

This BRD defines the business needs and expected outcomes for the Online Food Delivery Platform, forming the foundation for functional and system requirement specifications.
