

Project Vision Document

Online Food Delivery Platform

1. Document Control

Attribute	Details
Document Name	Project Vision Document
Project	Online Food Delivery Platform
Version	1.0
Prepared By	Lalita Khatri
Date	06-Jan-2026
Status	Draft

2. Purpose of the Document

This document defines the overall vision, goals, scope, and success criteria for the Online Food Delivery Platform.

It provides a shared understanding for business stakeholders, product owners, architects, developers, and testers.

3. Product Vision Statement

To build a scalable, secure, and user-friendly online food delivery platform that seamlessly connects customers, restaurants, and delivery partners, enabling fast, reliable, and transparent food ordering and delivery experiences.

4. Business Objectives

Objective ID	Objective Description
BO-01	Enable customers to order food online with minimal effort
BO-02	Provide restaurants a digital platform to manage menus and orders
BO-03	Optimize delivery operations through real-time tracking
BO-04	Increase customer retention via offers, ratings, and personalization
BO-05	Support high availability and scalability for peak demand

5. Target Stakeholders

Stakeholder	Description
Customers	End users ordering food
Restaurant Partners	Vendors listing food items
Delivery Partners	Personnel delivering orders
Admin Team	Platform operations and monitoring
Business Owners	Revenue and growth decision-makers

6. Target Users

User Type	Key Needs
Customer	Easy ordering, tracking, secure payment
Restaurant Owner	Order management, menu updates
Delivery Partner	Navigation, delivery status
Platform Admin	Monitoring, reporting, control

7. Problem Statement

Current food ordering processes face challenges such as:

- Limited restaurant reach
 - Manual order handling
 - Lack of real-time delivery visibility
 - Poor customer engagement and feedback mechanisms
-

8. Proposed Solution Overview

The Online Food Delivery Platform will:

- Offer web and mobile-based ordering
 - Provide real-time order and delivery tracking
 - Enable digital payments and refunds
 - Support ratings, reviews, and promotions
 - Deliver analytics and operational insights to admins
-

9. In-Scope Features

Category	Included Features
User Management	Registration, login, profile management
Ordering	Browse restaurants, add to cart, checkout
Payments	Online payment, wallet, COD
Delivery	Live tracking, delivery assignment
Restaurant Panel	Menu and order management
Admin Panel	User, order, and system management

10. Out-of-Scope Items

Excluded Items

Grocery delivery

In-house cooking

International logistics

Hardware integrations

11. Key Assumptions

- Users have access to smartphones or web browsers
 - Restaurants manage accurate menu information
 - Third-party payment gateways are reliable
 - Location services are available and enabled
-

12. Constraints

Constraint Type	Description
Technical	Internet connectivity required
Regulatory	Compliance with local food & payment laws
Operational	Dependency on restaurant availability
Time	Phased delivery approach

13. Success Criteria

Metric	Target
Order Completion Rate	$\geq 95\%$
Average Delivery Time	≤ 40 minutes
System Availability	$\geq 99.5\%$
Customer Rating	$\geq 4.2 / 5$

14. Risks and Mitigation

Risk	Impact	Mitigation
Delivery delays	High	Dynamic rider allocation
System downtime	High	Cloud scalability & monitoring
Payment failures	Medium	Multiple gateway support
Restaurant churn	Medium	Incentives and analytics

15. Conclusion

This Project Vision Document establishes a clear foundation for designing, developing, and delivering the Online Food Delivery Platform.

It aligns business goals with user needs and provides direction for all subsequent requirement and design documents.
