

Requirement Management Plan

Online Food Delivery Platform

1. Document Control

Attribute	Details
Document Name	Requirement Management Plan
Project	Online Food Delivery Platform
Version	1.0
Prepared By	Lalita Khatri
Date	06-Jan-2026
Status	Draft

2. Purpose

This document defines the process, roles, tools, and governance for managing project requirements throughout the lifecycle of the Online Food Delivery Platform. It ensures requirements are clearly defined, traceable, controlled, and validated.

3. Scope

This plan covers:

- Business, functional, and system requirements
 - Requirement change management
 - Traceability and version control
 - Validation and approval processes
-

4. Requirement Categories

Category	Description
Business Requirements	High-level business goals and needs
User Requirements	User expectations and capabilities
Functional Requirements	System behaviors and features
Non-Functional Requirements	Performance, security, usability

Regulatory Requirements	Legal and compliance constraints
-------------------------	----------------------------------

5. Roles and Responsibilities

Role	Responsibilities
Business Sponsor	Approves business requirements
Product Owner	Prioritizes and validates requirements
Business Analyst	Elicits, documents, manages requirements
Technical Lead	Reviews feasibility and design impact
QA Lead	Ensures testability and coverage
Change Control Board (CCB)	Approves requirement changes

6. Requirement Elicitation Methods

Method	Description
Stakeholder Interviews	Gather detailed expectations
Workshops	Collaborative requirement definition
Surveys	Capture broad user feedback
Prototyping	Validate usability assumptions
Document Analysis	Review existing systems

7. Requirement Documentation Standards

Standard	Description
Unique ID	Each requirement has a unique identifier
Clear Language	Unambiguous and testable
Priority Tagging	High / Medium / Low
Acceptance Criteria	Measurable validation rules
Traceability	Linked across lifecycle artifacts

8. Requirement Prioritization Approach

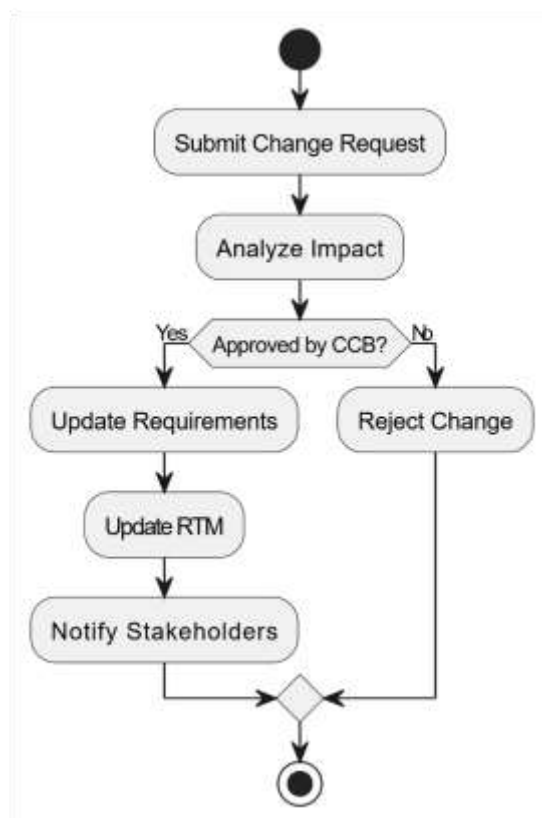

Priority	Definition
High	Critical for MVP release
Medium	Important but not blocking
Low	Nice-to-have enhancements

Method Used: MoSCoW (Must, Should, Could, Won't)

9. Requirement Change Management Process

Step	Description
Change Request Submission	Stakeholder submits change
Impact Analysis	Cost, schedule, technical review
CCB Review	Approval or rejection
Update Baseline	Revise requirement documents
Communication	Notify stakeholders

10. Change Control Workflow (UML)

11. Requirement Traceability

Traceability Link	Description
BRD → FRS	Business to functional mapping
FRS → SRS	Functional to system mapping
SRS → Test Cases	Validation coverage
Change Request → Updated Req	Version control

12. Tools and Repositories

Tool	Purpose
JIRA	Requirement tracking
Confluence	Documentation
Git	Version control
MS Excel	RTM management
Figma	Prototypes

13. Requirement Baseline Management

- Baselines established at end of each phase
 - Any change post-baseline requires CCB approval
 - Baselines stored in centralized repository
-

14. Validation and Sign-off

Activity	Owner
Requirement Review	Business Analyst
Stakeholder Validation	Product Owner
Technical Review	Technical Lead
Final Approval	Business Sponsor

15. Risks and Mitigation

Risk	Mitigation
Scope creep	Strict change control
Ambiguous requirements	Peer reviews
Missed requirements	Multi-method elicitation
Poor traceability	RTM enforcement

16. Conclusion

This Requirement Management Plan ensures that all requirements for the Online Food Delivery Platform are well-governed, traceable, and aligned with business objectives, minimizing rework and delivery risk.
