

Requirement Traceability Matrix (RTM)

Online Food Delivery Platform

1. Document Control

Attribute	Details
Document Name	Requirement Traceability Matrix (RTM)
Project	Online Food Delivery Platform
Version	1.0
Prepared By	Lalita Khatri
Date	06-Jan-2026
Status	Draft

2. Purpose

The Requirement Traceability Matrix (RTM) ensures that all business requirements are fully mapped to functional requirements, system requirements, and test cases.

It guarantees complete coverage, impact analysis, and change control throughout the project lifecycle.

3. Traceability Levels

Level	Description
BRD	Business Requirements
FRS	Functional Requirements
SRS	System Requirements
TC	Test Cases

4. RTM Table

BR ID	Business Requirement	FRS ID	Functional Requirement	SRS ID	System Requirement	Test Case ID	Status
BR-01	Online food ordering	FRS-01	Place order	SRS-01	Order processing	TC-01	Covered
BR-02	Menu management	FRS-02	Manage menu	SRS-02	Menu CRUD APIs	TC-02	Covered
BR-03	Delivery assignment	FRS-03	Assign delivery	SRS-03	Rider allocation	TC-03	Covered
BR-04	Online payment	FRS-04	Process payment	SRS-04	Payment gateway integration	TC-04	Covered
BR-05	Admin monitoring	FRS-05	View dashboards	SRS-05	Reporting module	TC-05	Covered

5. Change Impact Tracking

Change Request ID	Affected BR	Affected FRS	Affected SRS	Action
CR-01	BR-04	FRS-04	SRS-04	Update payment flow
CR-02	BR-01	FRS-01	SRS-01	Add cancellation rule

6. Coverage Analysis

Metric	Result
Total Business Requirements	5
Mapped Functional Requirements	5
Mapped System Requirements	5
Test Case Coverage	100%

7. RTM Maintenance Guidelines

Guideline
Update RTM after any approved change
Maintain unique IDs across documents
Ensure no orphan requirements
Review RTM at each milestone

8. Ownership and Review

Role	Responsibility
Business Analyst	Maintain RTM
QA Lead	Verify test coverage
Project Manager	Approve updates

9. Benefits of RTM

- Ensures requirement completeness
 - Simplifies impact analysis
 - Improves audit readiness
 - Enhances delivery quality
-

10. Conclusion

This RTM provides end-to-end visibility and control over requirements, ensuring that every business need is implemented, tested, and validated.
