

System Requirement Specification (SRS)

Online Food Delivery Platform

1. Document Control

Attribute	Details
Document Name	System Requirement Specification (SRS) / System Requirement Document (SRD)
Project	Online Food Delivery Platform
Version	1.0
Prepared By	Lalita Khatri
Date	06-Jan-2026
Status	Draft

2. Purpose

This document specifies the technical and system-level requirements for the Online Food Delivery Platform.

It defines how the system shall operate to support the approved functional requirements.

3. System Overview

The platform is a web and mobile-based distributed system consisting of:

- Client applications (Web, Android, iOS)
 - Backend services
 - Database and storage
 - Third-party integrations
-

4. System Architecture Overview

Layer	Description
Presentation Layer	Web & mobile user interfaces
Application Layer	Business logic and workflows
Integration Layer	Payment, maps, notifications
Data Layer	Databases and caching

Infrastructure	Cloud hosting and monitoring
----------------	------------------------------

5. System Requirements

5.1 User Authentication & Authorization

SRS ID	System Requirement
SRS-01	System shall support role-based access control
SRS-02	System shall encrypt user credentials
SRS-03	System shall support session management

5.2 Order Management

SRS ID	System Requirement
SRS-04	System shall process concurrent orders
SRS-05	System shall generate unique order IDs
SRS-06	System shall maintain order state transitions

5.3 Payment Integration

SRS ID	System Requirement
SRS-07	System shall integrate with multiple payment gateways
SRS-08	System shall handle payment callbacks securely
SRS-09	System shall log all transactions

5.4 Delivery & Tracking

SRS ID	System Requirement
SRS-10	System shall assign delivery partners based on proximity
SRS-11	System shall support real-time location updates
SRS-12	System shall notify users of status changes

5.5 Admin & Reporting

SRS ID	System Requirement
SRS-13	System shall provide dashboards for monitoring
SRS-14	System shall generate downloadable reports

6. Non-Functional Requirements

6.1 Performance

Requirement	Target
API Response Time	≤ 2 seconds
Concurrent Users	$\geq 10,000$
Order Processing Time	≤ 5 seconds

6.2 Security

Requirement
HTTPS communication
Data encryption at rest
Secure API authentication
OWASP compliance

6.3 Availability & Reliability

Requirement	Target
System Uptime	$\geq 99.5\%$
Backup Frequency	Daily
Disaster Recovery	≤ 4 hours RTO

6.4 Scalability

Requirement
Horizontal scaling support
Auto-scaling during peak hours

7. Data Requirements

Data Entity	Description
User	Customer, restaurant, delivery
Order	Order details and status
Payment	Transaction records
Menu	Food items and pricing

8. External Interface Requirements

Interface	Description
Payment Gateway	Online transactions
Map Service	Location and routing
Notification Service	SMS, email, push

9. System Constraints

Constraint Type	Description
Regulatory	Payment and data protection laws
Technical	Third-party API limits
Operational	Cloud cost limits

10. System Dependencies

Dependency	Description
Payment Gateway	Transaction processing
Map API	Real-time tracking
SMS Gateway	Notifications

11. Validation and Verification

Activity	Owner
Requirement Review	System Architect
Performance Testing	QA Team

Security Testing	Security Team
Final Approval	Stakeholders

12. Acceptance Criteria

Criteria
All system requirements implemented
Performance targets met
Security audits passed
Stakeholder sign-off

13. Conclusion

This SRS/SRD provides a comprehensive technical foundation ensuring the Online Food Delivery Platform is secure, scalable, and reliable, and fully supports the defined functional requirements.
